

SunSystems for Insurance

➔ Infor FMS SunSystems gives you the flexibility and control you need to adapt to the demands of even the most challenging global business environment.

Do business better.

Chief financial officers (CFOs) and other finance managers within the dynamic insurance industry face greater challenges than ever before. Issues of business growth, regulatory compliance, risk management, and cost control are complex—especially for global businesses. But along with these challenges, finance managers have the opportunity to add value to their organizations, and make a real difference with the right technology solution.

Whether your company focuses on reinsurance, property and casualty (P&C), life, or multi-line insurance, you need a flexible financial management system (FMS) that will help you reduce costs, improve business insight, and facilitate regulatory compliance.

Leverage experience.

Infor™ FMS SunSystems, a proven solution for the insurance industry, has more than 20 years of built-in experience and is used by hundreds of insurance customers around the world. This powerful, easy-to-use solution has multi-language, currency, and reporting capabilities that facilitate global business. Infor FMS SunSystems helps businesses meet international financial reporting standards (IFRS) and generally accepted accounting principles (GAAP), as well as management reporting, local statutory reporting, and other reporting requirements. In addition, Infor has over 110 offices in more than 30 countries, an extensive partner network, and 24x7 global customer support to facilitate business anytime, anywhere.

INFOR™

Get business specific.

Infor FMS SunSystems has a comprehensive and extensible analytical structure, with multiple analysis dimensions that facilitate changing reporting and analysis requirements. The solution reduces reliance on spreadsheets, as well as the need to add new accounts to the general ledger and rewrite existing reports. It also simplifies other reporting complexities associated with business change.

Infor FMS SunSystems combines a comprehensive general ledger system with leading reporting and analysis capabilities in a single solution—meaning it provides you with better account reconciliation, audit trails, and ad hoc reporting and analysis. Plus, Infor FMS SunSystems' open architecture lets you leverage existing technology investments. The solution is also designed to be administered and maintained by Finance, with minimal IT involvement required. This allows you to quickly react to market changes without having to rely on your already-stretched IT resources.

Infor FMS SunSystems gives you all the tools you need to effectively manage and integrate operational information, as well as automate finance processes such as forecasting and budgeting. The solution integrates general ledger, accounts payable, fixed assets, and other financial processes with operational systems such as claims and policy management—extending the value of both your financial information and existing operational systems.

You can deliver information such as claims, lines of business, underwriting, broker/agent, customer, and other key business analysis to managers across the enterprise. Business information is available in a number of formats, including dashboards, charts, and graphs—giving you more business insight and the ability to perform ad hoc analysis. A fully integrated reporting tool performs queries and manipulates end-user computations. Real-time data is readily accessible through Excel® and other Microsoft® Office interfaces, or through Infor FMS Query & Analysis. This results in better management decisions and customer service, whether your company is an insurance carrier, reinsurer, or insurance broker.

Infor FMS SunSystems' extended financial management solution also facilitates your budgeting, forecasting, and business planning processes. The system allows you to link budgets and forecasts with overall business targets, create multiple "what if" scenarios, develop driver-based and dynamic rolling plans, and test assumptions.

See results now.

Designed to address key challenges faced by finance managers daily, Infor FMS SunSystems offers you real-time insight into critical financial and operational information. By delivering comprehensive reporting and analysis, rapid deployment, and ease of use, the solution provides you with fast ROI and low total cost of ownership. Infor FMS SunSystems gives you the flexibility and control you need to quickly adapt to the demands of even the most challenging global business environment.

About Infor.

Infor acquires and develops functionally rich software backed by thousands of domain experts and then makes it better through continuous innovation, faster implementation options, global enablement, and flexible buying options.
