

# Fleet Management

“ We now recover in excess of \$1 million in warranties. ”

JEFF VOGSTAD  
PROJECT MANAGER  
COAST MOUNTAIN BUS COMPANY

## Be enterprising.

Real-world fleet operations are capital-intensive, and success hinges on how well companies track and manage their vehicles and capitalize on opportunities for productivity and cost-per-mile savings. Proactively managing performance is more important than ever. And with all the pressures enterprises contend with to deliver optimal results, management of their assets is critical. Whether those assets are truck, bus, utility, construction, heavy equipment, commercial transportation, or rail fleets, they need the backing of technology that can help drive rapid results.

## Leverage experience.

Infor™ has more than 25 years of experience in enterprise asset management, and Infor EAM Enterprise Edition Fleet Management has a proven track record for delivering innovation and value to leading companies managing fleets. This best-in-class, feature-rich asset and maintenance component makes it easier to process warranty claims and better manage tires and fuels. Vehicle performance also improves through more comprehensive maintenance.

With Fleet Management, your company can track physical assets, schedule preventive and predictive maintenance, manage spare parts, and create paperless business processes with handheld technology. Not only that, its modular design makes this dynamic component easy to tailor to your particular needs.

## Get business specific.

Companies around the globe rely on Fleet Management to optimize the efficiency of their fleets and reap the benefits of greater fleet performance and lower downtime for increased productivity and savings. Fleet Management does this by helping organizations like yours reduce breakdowns, track repair histories, and create dependable management of asset warranties. It enables you to track vehicle maintenance, improve tire management, and track warranty information using these key features:

### Vehicle Maintenance Reporting Standards (VMRS)

With the automatically-populated VMRS standard codes provided by Fleet Management, you gain the ability to accurately track your maintenance activities for all the vehicles in your fleet and profit from enhanced reporting.

### Fuel Management

Handle on-site fuel inventory with greater ease and efficiency. On top of that, by integrating Fleet Management with fuel card management systems, you can also track your company's vehicles, fuel, oil, and other fluid.

### Tire Management

Benefit from pinpoint tracking—capture data for each tire, such as ID, description, accrued cost, and work order history for each vehicle to better manage your tire assets. You can also track all casing through the re-treading process, crediting the unused portion of tire life to vehicle history.

### Warranties

Lower overall costs by immediately flagging warranty repairs for vehicle, component, or replacement parts, as well as any asset of a major subsystem when opening a work order. You'll also have the ability to automatically create a warranty claim to your supplier.

## See results now.

Fleet Management drives greater fleet performance and profitability for enterprising transportation companies by helping them better track and manage their fleets. Capitalize on this comprehensive component to:

- Maximize vehicle lifecycles by reducing breakdowns
- Track repair histories
- Operate safely and efficiently
- Create dependable management of asset warranties
- Boost earnings and available operating capital
- Adapt quickly to changing capital markets
